

Tecnoware Company Profile

The background of the slide features a large, angled photograph of a building facade. The upper part of the building has a dark blue or black section with the company name 'TECNOWARE' in large white letters and 'ITALIAN POWER SYSTEMS' in smaller green letters below it. The lower part of the building is made of light-colored bricks and has a large window reflecting a blue sky with clouds. A white diagonal shape cuts across the left side of the image.

TECNOWARE
ITALIAN POWER SYSTEMS

Different Power Company

English

*“We design and manufacture products for electrical continuity,
using the most advanced technologies in respect of the environment and safety,
in constant synergy with our partners.
This is our Company and this is how we tell
who we are, what we do and what we believe in”*

*In a profitable market, we are proud of our diversity,
of having built a different model in which the human relationship
with Partners, Employees and Collaborators is today as yesterday, in first place.*

*We have never conformed to the standard supplier-customer relationship,
we consider the latter a Partner who finds satisfaction and success
in the quality of our products and services.*

*Enthusiasm and commitment are those of the beginning,
we change without distorting ourselves, we evolve without losing sight of the Values
for which thousands of Partners, for decades, renew their trust in Tecnoware.*

Riccardo Benedetti

Italian Quality in the world

Tecnoware has been manufacturing UPS for private individuals, companies and industry in Italy **since 1986**.

Together on

Together On Philosophy: High **efficiency**, 100% materials **Recyclable**, **Sustainable** Development Projects.

Over 70 controls and use of **components first choice** to guarantee products up to 5 years

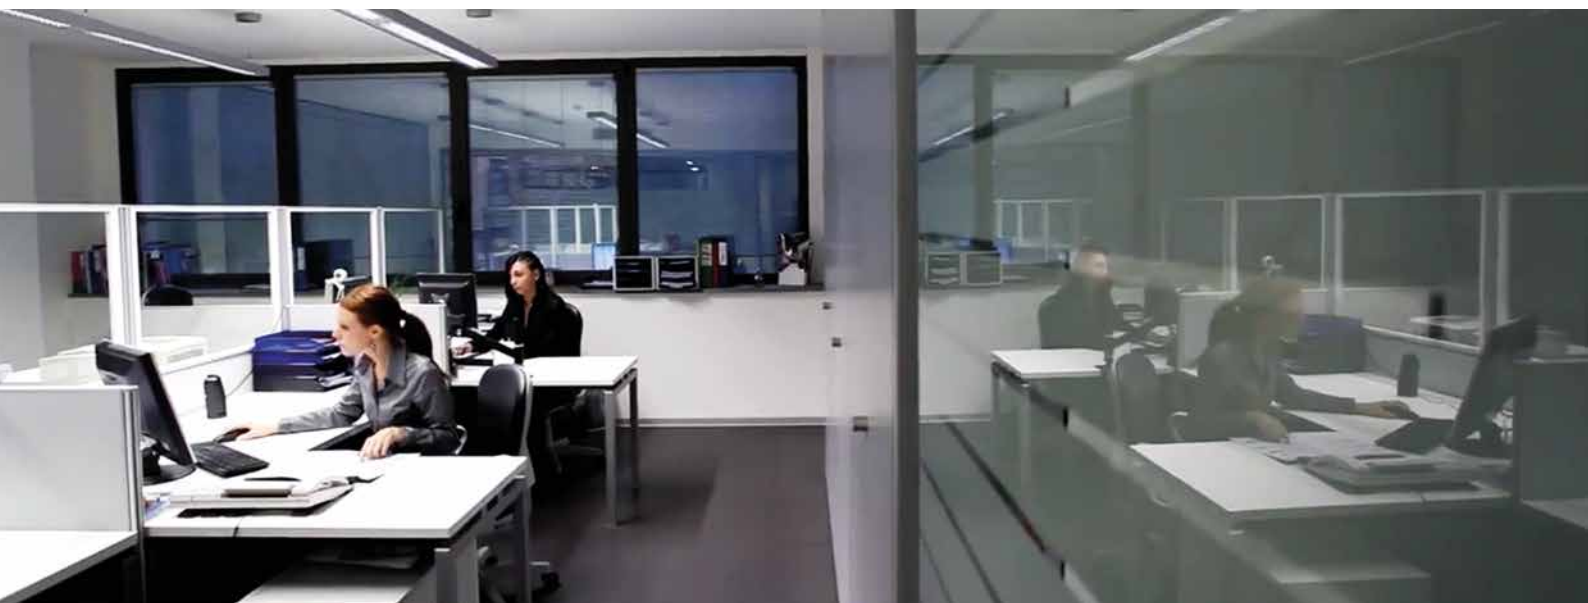

Partners at the center

Branches and Partners in
50 Countries in the World.

Training, Webinar,
Digital **Communication** and **Events**.

24/7 Technical / Commercial Support, Shipping in **24 hours**,
Configurations in **30 minutes** and Installations and maintenance **On-site**.
